

Lypossage™ is a new, all-natural body contouring treatment that delivers measurable results. Figure imbalances like cellulite and bulges on the thighs or abdomen respond readily to Lypossage.

If you've been frustrated when trying to "spot-reduce" areas of your body, you'll be delighted with the results of this unique treatment. It stimulates the immune system and helps detoxify the body. Best of all, Lypossage™ will help you feel as good as you look!

### **How does it work?**

Lypossage cleanses the body of stagnant, stalled lymphatic fluid (lymph edema) that can create the lumps and bulges we know as figure imbalance. The deeper Lypossage strokes break up adhesions under the skin that can contribute to the dimpled, uneven appearance of cellulite. Lypossage also tones the muscles, lifting and firming sagging tissue.

### **What does Lypossage treatment consist of?**

Each Lypossage session lasts about 30 minutes and are performed three times a week for six weeks, and then monthly as maintenance. This technique works by cleansing the body of stagnant fluid, breaking up adhesions under the skin, toning muscles and firming sagging tissue. Studies have shown average inch loss of 1-1/2 inches per thigh and a cumulative average inch loss of almost 7 inches. Most women will drop a dress size or two without a significant reduction in their weight.

### **Zone 1 — Lower Body**

- Hips
- Thighs
- Buttocks
- Lower Abdomen

### **What results can I expect?**

Dimension loss, improved posture, diminished look of cellulite, improved muscle tone, improved skin tone, cleansing of lymphatic system, and improved circulation.

### **Zone 2 — Upper Body**

- Arms

- Back
- Decollete (chest and neck area)
- Upper abdomen

**What results can I expect?**

Improved posture, dimension loss in the arms and abdomen, firming of the bust area, improved circulation and lymphatic drainage.

**Zone 3 — Head**

- Face
- Eyes
- Jaw line and jowels
- Neck

**What results can I expect?**

A natural face-lift. Lifting and toning sagging tissues in the lower face and neck, diminishing the appearance of wrinkles and significantly improving skin tone and texture.
